💙 TEAM BLUE

Portfolio Project & GitHub Collaboration Guide

Team Leader: Naomi Gabriel

1. Team Members

#	Member	Main Responsibility
👑	Naomi Gabriel	Team Leader / GitHub Manager
1	Moses	Home / Hero
2	Salima	About
3	Sarah	Skills & Experience
4	Acha K. Excel	Services
5	Emmanuel Michael	Projects
6	Godwin Daniel	Team + Testimonials + Contact

2. Project Structure

The team will work from the provided ProMan portfolio template. The existing template is divided into clear sections, making it suitable for section-based GitHub collaboration.

The main sections include Home/Hero, About, Skills & Experience, Services, Projects, Team, and Testimonials/Contact.

3. Task Allocation

Naomi Gabriel — Team Leader / GitHub Manager

- Create and manage the GitHub repository.
- Add all six members as collaborators.
- Keep the main branch stable.
- Review pull requests and merge completed work.
- Resolve merge conflicts.
- Carry out final integration, responsiveness checks, and testing.
- Coordinate the final submission/presentation.

Branch: main

Moses — Home / Hero

- Update the opening/hero section.
- Replace placeholder name and introduction.
- Update typed-text roles.
- Update CV and video buttons where required.
- Replace the profile image.

- Check that the hero looks good on desktop and mobile.

Branch: feature/home-moses

Salima — About

- Rewrite the About content.
- Replace placeholder information.
- Update image/content where necessary.
- Keep the existing Bootstrap structure.
- Make the section match the project's agreed theme.

Branch: feature/about-salima

Sarah — Skills & Experience

- Update technical skills.
- Update skill percentages/progress bars.
- Update education/experience information.
- Remove unnecessary placeholder information.
- Check that progress bars display correctly.

Branch: feature/skills-sarah

Acha K. Excel — Services

- Decide on the relevant services for the project.
- Update service titles and descriptions.
- Update icons where appropriate.
- Keep service cards visually consistent.
- Remove irrelevant template services.

Branch: feature/services-acha

Emmanuel Michael — Projects

- Replace template projects.
- Add the team's actual projects/work.
- Update project titles and descriptions.
- Replace project images.
- Add project links where required.
- Check that the project layout remains responsive.

Branch: feature/projects-emmanuel

Godwin Daniel — Team + Testimonials / Contact

- Add the seven Team Blue members to the Team section.
- Update names, photos, positions, and social links where required.
- Update testimonials.
- Update contact information and contact form.
- Check footer/contact-related information.

Branch: feature/team-contact-godwin

4. Recommended GitHub Workflow

Nobody should directly edit the main branch. Each member works on their own feature branch.

1. Start from the latest main branch.
2. Create or switch to your assigned feature branch.
3. Make changes only for your assigned section.
4. Test your work locally.
5. Commit with a clear message.
6. Push your branch to GitHub.
7. Create a Pull Request into main.
8. Naomi reviews the changes.
9. After approval, Naomi merges the Pull Request.
10. Pull the updated main branch before starting additional work.

5. Branch Structure

- main
- feature/home-moses
- feature/about-salima
- feature/skills-sarah
- feature/services-acha
- feature/projects-emmanuel
- feature/team-contact-godwin

6. Suggested Commit Messages

Moses: git commit -m "Update home hero section"

Salima: git commit -m "Update about section"

Sarah: git commit -m "Update skills and experience"

Acha K. Excel: git commit -m "Update services section"

Emmanuel Michael: git commit -m "Update projects section"

Godwin Daniel: git commit -m "Update team testimonials and contact"

7. Important Team Rules

- Do not directly edit main unless you are Naomi and are doing approved integration work.
- Do not create separate copies such as index-moses.html or index-salima.html.
- Stay within your assigned section unless the team leader asks you to help elsewhere.
- Communicate before changing shared CSS, JavaScript, images, or library files.
- Test your changes before opening a Pull Request.

- Use clear commit messages.
- Do not overwrite another member's work.
- Keep the website's colors, fonts, spacing, and overall visual identity consistent.

9. Final Integration Checklist — Naomi

- All six collaborators have submitted their work.
- All Pull Requests have been reviewed.
- All approved work has been merged into main.
- Navigation links work.
- Images load correctly.
- Buttons and links work.
- Contact form/layout works as intended.
- No placeholder names or text remain.
- The site looks good on desktop and mobile.
- No obvious HTML/CSS/JavaScript errors remain.
- The final GitHub repository is organized.
- README.md contains the project information and team members.
